

Bar & Chain Oil

Dura Flow™ Bar & Chain Oil is a tacky lubricant made from high viscosity index base oils with the desired flow and pumpability properties to ensure adequate lubrication over a wide temperature range. Dura Flow™ Bar & Chain Oil has excellent retention time, superior tackiness, and high surface tension.

This oil can also be used as a general lubricant where no specific performance properties are required.

This product should NOT be used as an engine oil or as a transmission fluid.

Typical Properties:

Product: Dura Flow™ Bar & Chain Oil		
SAE Viscosity Grade	30	N/A
Product Code	5017	5018
Kinematic Viscosity @ 100 °C cSt (ASTM D-445)	10.5*	9.0*
Kinematic Viscosity @ 40 °C cSt (ASTM D-445)	60.0*	60.0*
Viscosity Index (ASTM D-2270)	166*	127*

- Typical properties of Bar and Chain oil may vary more than other lubricants.
